TEMPLATE ROWS									
See the Help worksheet for information about using template rows.									
1	[Task Category (label only)]								
2	**[Task Category (summary)]**		Wed 12/11/19	Wed 12/11/19	1		1		
2.1	[Level 2 Task]		Wed 12/11/19	Wed 12/11/19	1	0%	1	0	1
2.1.1	. [Level 3 Task]		Wed 12/11/19	Wed 12/11/19	1	0%	1	0	1
2.1.1.1	. . [Level 4 Task]		Wed 12/11/19	Wed 12/11/19	1	0%	1	0	1

[1] Today's Date:
Use the formula =TODAY() to make the red line in the gantt chart display the current day, or enter the date manually.

[2] Work Breakdown Structure:
Level 1: 1, 2, 3, ...
Level 2: 1.1, 1.2, 1.3,
Level 3: 1.1.1, 1.1.2,
The WBS uses a formula to control the numbering, but the formulas are different for different levels.

[3] Task:
Enter the name of each task and sub-task. Use spaces to indent sub-tasks.

[4] Task Lead
Enter the name of the Task Lead in this column.

[5] Task Start Date:
You can manually enter the Start Date for each task or use a formula to create a dependency on a Predecessor. For example, you could enter =enddate+1 to set the Start date to the next calendar day, or =WORKDAY(enddate,1) to set the Start date to the next work day (excluding weekends), where enddate is the cell reference for the End date of the Predecessor task.

[6] End Date:
Calculated based on the Start Date and the duration of the task.

[7] Duration:
The duration is the number of calendar days for the given task.

[8] Percent Complete:
Update the status of this task by entering the percent complete (between 0% and 100%).

[9] Work Days:
Work Days exclude Saturday and Sunday. The Pro version allows you to use this column as an input.

[10] Calendar Days Complete:
This column is calculated by multiplying the Duration by the %Complete and rounding down to the nearest integer.
Note: This column is required, but may be hidden prior to printing.

[11] Calendar Days Remaining:
This column is calculated by subtracting the Days Complete from the Duration.
Note: This column is required, but may be hidden prior to printing.
